

Incomaker for Publishing

Sending newsletters to your readers is a perfect way how to bring them to your website. Every person is unique. Don't they deserve receiving personalized content, not content for everyone?

It is a terrible job preparing newsletters & notifications manually. Why not employ artificial intelligence?

Your newsfeed.

From the same newsfeed, every individual person receives its own personalized message digests.

Send individual digests to your readers that are tailored to their interests. Fully automatically.

- ✓ More site traffic - higher income from commercials
- ✓ Fully automated - no human work needed
- ✓ More information about readers behavior
- ✓ Another channel for Ads - no AdBlock

- Powered by artificial intelligence
- Attract more visitors to your website
- Monetize your content
- Automate newsletters & social media
- No human work needed
- Emails, SMS, social media, mobile apps...
- On-site and off-site banners
- Monitor, what individual readers read
- Add targeted ads that **cannot be AdBlocked**
- GDPR compliant

Incomaker for Publishing is based on a successful Incomaker marketing automation platform with artificial intelligence.

About Incomaker is a Czech-Portuguese startup. Since 2015, Incomaker develops its marketing automation platform based on artificial intelligence. In 2016, the company received the highly prestigious grant for the best innovation from Horizon 2020 EU fund.
